

Charging for everyone, everywhere.

**Rapid charging for electric vehicles.
100% certified green electricity.
With E.ON Drive.**

E.ON Drive is building the charging network of the future across Europe.

We combine network development, construction and operation of public charging infrastructure for electric passenger and commercial vehicles, and benefit from decades of energy expertise.

In numbers:

- E.ON Drive Infrastructure operates **> 4,000 public charging points** across Europe.
- Rapid growth: **+1,000 new HPC charging points planned per year.**
- **Number 1 in the market** along the German highway.*
- **>80% brand awareness** for E.ON brand in main markets.**
- E.ON supplies innovative customer solutions for energy, with more than **51 million*** electricity and gas customers.**

> 4.000
EDRI
charging points

* Number of locations along German motorways, 2021.

** E.ON Brand Tracker, Global Research & Insights, unaided brand awareness, June to November 2022, six-month rolling value, DE, CZ, SE, UK.

*** 2021, including customers in Turkey and the Slovakian ZSE.

State-of-the-art fast-charging infrastructure for attractive locations.

The advantages for you and your customers:

- **Increased visit frequency** due to attractive additional offer.
- **Visibility** in all known e-mobility apps and navigation systems.
- Positioning your company as **modern, climate-friendly and ecological.**
- **Co-branding of the charging stations** offers additional opportunities to place your brand.

A risk and hassle-free offer for you.

You provide the space.

We take care of everything else.

We take on all investment and operating costs.

We equip your location with charging infrastructure according to your needs.

We guarantee professional implementation.

Our own deployment team will take care of all construction work.

We support you in fulfilling any legal requirements.

We are responsible for maintenance & inspection, and fault clearance.

We offer operational reliability thanks to decades of experience in the energy sector.

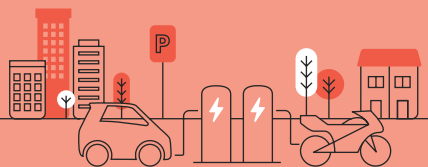

We supply 100% certified green electricity.

E.ON Drive invests in central public locations.

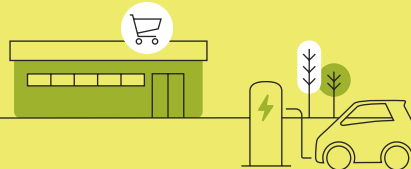

E.ON Drive is investing in **3 key use cases** for the optimal expansion of public charging infrastructure:

Neighbourhood

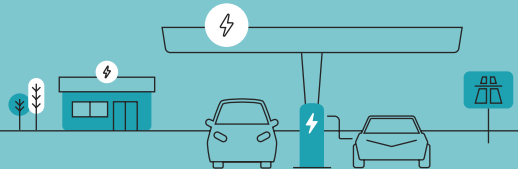

Charging of e-vehicles in the immediate vicinity of densely populated residential areas, city centres and attractions in cooperation with municipal partners and parking operators.

High frequency destinations

Fast charging of e-vehicles to increase attractiveness of locations such as supermarkets, hotels, and restaurants.

On the road

Very fast charging of e-vehicles for quick range extension along motorways.

E-Mobility is simple.

**If you work with the right team:
E.ON Drive Infrastructure.**
